ABOUT ME

I choose IT because I like working with computer and to be free to work anywhere, anytime I want. To be a professional IT engineer is my goal someday, and to do so I'll keep learning as much as I can, be ready for any challenges in my path. I'm not much as a leader or a team person, but it's ok for me to fit in and finish every tasks that are given. There are lots of major in IT, but I chose Web Developing so far. Maybe I'll meet other branches someday and accomplish them is my hobby.
